#### **5. Certification Regarding Environmental Tobacco Smoke**

Public Law 103-227, also known as the Pro-Children Act of 1994 (Act), requires that smoking not be permitted in any portion of any indoor facility owned or leased or contracted for by an entity and used routinely or regularly for the provision of health, daycare, early childhood development services, education or library services to children under the age of 18, if the services are funded by Federal programs either directly or through State or local governments, by Federal grant, contract, loan, or loan guarantee. The law also applies to children's services that are provided in indoor facilities that are constructed, operated, or maintained with such Federal funds. The law does not apply to children's services provided in private residence, portions of facilities used for inpatient drug or alcohol treatment, service providers whose sole source of applicable Federal funds is Medicare or Medicaid, or facilities where WIC coupons are redeemed.

Failure to comply with the provisions of the law may result in the imposition of a civil monetary penalty of up to \$1,000 for each violation and/or the imposition of an administrative compliance order on the responsible entity.

By signing the certification, the undersigned certifies that the applicant organization will comply with the requirements of the Act and will not allow smoking within any portion of any indoor facility used for the provision of services for children as defined by the Act.

The applicant organization agrees that it will require that the language of this certification be included in any subawards which contain provisions for children's services and that all subrecipients shall certify accordingly.

The Public Health Services strongly encourages all grant recipients to provide a smoke-free workplace and promote the non-use of tobacco products. This is consistent with the PHS mission to protect and advance the physical and mental health of the American people.

#### **5. Certification Regarding Environmental Tobacco Smoke**

Public Law 103-227, also known as the Pro-Children Act of 1994 (Act), requires that smoking not be permitted in any portion of any indoor facility owned or leased or contracted for by an entity and used routinely or regularly for the provision of health, daycare, early childhood development services, education or library services to children under the age of 18, if the services are funded by Federal programs either directly or through State or local governments, by Federal grant, contract, loan, or loan guarantee. The law also applies to children's services that are provided in indoor facilities that are constructed, operated, or maintained with such Federal funds. The law does not apply to children's services provided in private residence, portions of facilities used for inpatient drug or alcohol treatment, service providers whose sole source of applicable Federal funds is Medicare or Medicaid, or facilities where WIC coupons are redeemed.

Failure to comply with the provisions of the law may result in the imposition of a civil monetary penalty of up to \$1,000 for each violation and/or the imposition of an administrative compliance order on the responsible entity.

By signing the certification, the undersigned certifies that the applicant organization will comply with the requirements of the Act and will not allow smoking within any portion of any indoor facility used for the provision of services for children as defined by the Act.

The applicant organization agrees that it will require that the language of this certification be included in any subawards which contain provisions for children's services and that all subrecipients shall certify accordingly.

The Public Health Services strongly encourages all grant recipients to provide a smoke-free workplace and promote the non-use of tobacco products. This is consistent with the PHS mission to protect and advance the physical and mental health of the American people.

Public Law 103-227, also known as the Pro-Children Act of 1994 (Act), requires that smoking not be permitted in any portion of any indoor facility owned or leased or contracted for by an entity and used routinely or regularly for the provision of health, daycare, early childhood development services, education or library services to children under the age of 18, if the services are funded by Federal programs either directly or through State or local governments, by Federal grant, contract, loan, or loan guarantee. The law also applies to children's services that are provided in indoor facilities that are constructed, operated, or maintained with such Federal funds. The law does not apply to children's services provided in private residence, portions of facilities used for inpatient drug or alcohol treatment, service providers whose sole source of applicable Federal funds is Medicare or Medicaid, or facilities where WIC coupons are redeemed.

Failure to comply with the provisions of the law may result in the imposition of a civil monetary penalty of up to \$1,000 for each violation and/or the imposition of an administrative compliance order on the responsible entity.

By signing the certification, the undersigned certifies that the applicant organization will comply with the requirements of the Act and will not allow smoking within any portion of any indoor facility used for the provision of services for children as defined by the Act.

The applicant organization agrees that it will require that the language of this certification be included in any subawards which contain provisions for children's services and that all subrecipients shall certify accordingly.

The Public Health Services strongly encourages all grant recipients to provide a smoke-free workplace and promote the non-use of tobacco products. This is consistent with the PHS mission to protect and advance the physical and mental health of the American people.

<sup>1</sup>The 24-month expenditure period for the COVID-19 Relief supplemental funding is **March 15, 2021 – March 14, 2023**, which is different from the

expenditure period for the "standard" MHBG/SUPTRS BG. If your state or territory has an approved No Cost Extension (NCE) for the FY 21 SABG COVID-19 Supplemental Funding, you have until March 14, 2024 to expend the COVID-19 Relief Supplemental Funds.

The SUPTRS BG ARP planned expenditures for the period of October 1, 2023 - September 30, 2024 should be entered here in the first ARP column, and the SUPTRS BG ARP planned expenditures for the period of October 1, 2024, through September 30, 2025, should be entered in the second ARP column.

<sup>5</sup>Prevention other than Primary Prevention

<sup>6</sup>For the purpose of determining which states and jurisdictions are considered "designated states" as described in section 1924(b)(2) of Title XIX, Part B, Subpart II of the Public Health Service Act (42 U.S.C. § 300x-24(b)(2)) and section 45 CFR § 96.128(b) of the Substance use disorder Prevention and Treatment Block Grant (SUPTRS BG); Interim Final Rule (45 CFR 96.120-137), SAMHSA relies on the AtlasPlus HIV data report produced by the Centers for Disease Control and Prevention (CDC), National Center for HIV/AIDS, Viral Hepatitis, STD and TB Prevention (NCHHSTP). The most recent AtlasPlus HIV data report published on or before October 1 of the federal fiscal year for which a state is applying for a grant is used to determine the states and jurisdictions that will be required to set-aside 5 percent of their respective SUPTRS BG allotments to establish one or more projects to provide early intervention services regarding the human immunodeficiency virus (EIS/HIV) at the sites at which individuals are receiving SUD treatment services. In FY 2012, SAMHSA developed and disseminated a policy change applicable to the EIS/HIV which provided any state that was a "designated state" in any of the three years prior to the year for which a state is applying for SUPTRS BG funds with the flexibility to obligate and expend SUPTRS BG funds for EIS/HIV even though the state's AIDS case rate does not meet the AIDS case rate threshold for the fiscal year involved for which a state is applying for SUPTRS BG funds. Therefore, any state with an AIDS case rate below 10 or more such cases per 100,000 that meets the criteria described in the 2012 policy guidance will be allowed to obligate and expend SUPTRS BG funds for EIS/HIV if they chose to do so and may elect to do so by providing written notification to the CSAT SPO as a part of the SUPTRS BG Application.

<sup>7</sup>This expenditure category is mandated by Section 1243 of the Consolidated Appropriations Act, 2023

Please enter the total amount of the SUPTRS BG, COVID-19, or ARP funds expended for each activity. Only complete this table if the state plans to fund subrecipient agency expenditures for non-direct services/system development with SUBG or SUPTRS BG, COVID-19, and/or ARP supplemental dollars. Grantees should not include on Table 6 the SSA expenditures of up to 5% that is allowed for the SSA cost of administering the grant. Non-direct services/system development activities exclude expenditures through funding mechanisms for subrecipients providing treatment "direct service" or primary prevention efforts themselves, that are listed on Table 7. Instead, these Table 6 subrecipient agency expenditures provide support to those activities.

## Environmental Factors and Plan

### 15. Crisis Services – Required for MHBG, Requested for SUPTRS BG

#### Narrative Question

Substance Abuse and Mental Health Services Administration (SAMHSA) is directed by Congress to set aside 5 percent of the Mental Health Block Grant (MHBG) allocation for each state to support evidence-based crisis systems. The statutory language outlines the following for the 5 percent set-aside:

*....to support evidenced-based programs that address the crisis care needs of individuals with serious mental illnesses and children with serious emotional disturbances, which may include individuals (including children and adolescents) experiencing mental health crises demonstrating serious mental illness or serious emotional disturbance, as applicable.*

*CORE ELEMENTS: At the discretion of the single State agency responsible for the administration of the program, the funds may be used to expend some or all of the core crisis care service components, as applicable and appropriate, including the following:*

- *Crisis call centers*
- *24/7 mobile crisis services*
- *Crisis stabilization programs offering acute care or subacute care in a hospital or appropriately licensed facility, as determined by such State, with referrals to inpatient or outpatient care.*

*STATE FLEXIBILITY: In lieu of expanding 5 percent of the amount the State receives pursuant to this section for a fiscal year to support evidence based programs as required a State may elect to expend not less than 10 percent of such amount to support such programs by the end of two consecutive fiscal years.*

A crisis response system will have the capacity to prevent, recognize, respond, de-escalate, and follow-up from crises across a continuum, from crisis planning, to early stages of support and respite, to crisis stabilization and intervention, to post-crisis follow-up and support for the individual and their family. SAMHSA expects that states will build on the emerging and growing body of evidence for effective community-based crisis-intervention and response systems. Given the multi-system involvement of many individuals with M/SUD issues, the crisis system approach provides the infrastructure to improve care coordination, stabilization service to support reducing distress, promoting skill development and outcomes, manage costs, and better invest resources.

SAMHSA developed [Crisis Services: Meeting Needs, Saving Lives](#), which includes "[National Guidelines for Behavioral Health Crisis Care: Best Practice Toolkit](#)" as well as an [Advisory: Peer Support Services in Crisis Care](#) and other related National Association of State Mental Health Programs Directors (NASMHPD) papers on crisis services. SAMHSA also developed "[National Guidelines for Child and Youth Behavioral Health Crisis Care](#)" which offers best practices, implementation strategies, and practical guidance for the design and development of services that meet the needs of children, youth and their families experiencing a behavioral health crisis. Please note that this set aside funding is dedicated for the core set of crisis services as directed by Congress. Nothing precludes states from utilizing more than 5 percent of its MHBG funds for crisis services for individuals with serious mental illness or children with serious emotional disturbances. If states have other investments for crisis services, they are encouraged to coordinate those programs with programs supported by this new 5 percent set aside. This coordination will help ensure services for individuals are swiftly identified and are engaged in the core crisis care elements.

1. Briefly narrate your state's crisis system. For all regions/areas of your state, include a description of access to the crisis call centers, availability of mobile crisis and behavioral health first responder services, utilization of crisis receiving and stabilization centers.

Virginia's comprehensive continuum of crisis services is inclusive of mobile response, call centers with the equivalent of air traffic control capabilities, and Crisis Receiving and Stabilization Centers (CRSC). All mobile crisis response in each state region (public and private organizations) start as a call to the call center, move to regional dispatch, and responded to by Mobile Crisis Responders of closest proximity utilizing our Virginia Crisis Connect platform.

Mobile Crisis Responders can assist the individual in exploring and accessing other services as required. To improve the capacity of a safe place to go, state funding to expand the Crisis Stabilization and Receiving centers footprint statewide. At completion of this expansion, Virginia will have nearly doubled its footprint of site-based crisis programming.

2. In accordance with the guidelines below, identify the stages where the existing/proposed system will fit in.

*a) The **Exploration** stage: is the stage when states identify their communities' needs, assess organizational capacity, identify how crisis services meet community needs, and understand program requirements and adaptation.*

- b) The **Installation** stage: occurs once the state comes up with a plan and the state begins making the changes necessary to implement the crisis services based on the SAMHSA guidance. This includes coordination, training and community outreach and education activities.
- c) **Initial Implementation** stage: occurs when the state has the three-core crisis services implemented and agencies begin to put into practice the SAMHSA guidelines.
- d) **Full Implementation** stage: occurs once staffing is complete, services are provided, and funding streams are in place.
- e) **Program Sustainability** stage: occurs when full implementation has been achieved, and quality assurance mechanisms are in place to assess the effectiveness and quality of the crisis services.

b. Briefly explain your stages of implementation selections here.

Virginia has two call centers that are supporting 988 as a part of a full crisis continuum. These two call centers have been supported by the Vibrant Capacity Grant as well as the two SAMHSA capacity grants. In addition, the Virginia Legislature established a surcharge on wireless plans to provide sustainable funding to 9-8-8 call centers, these efforts all provide a foundation for the implementation of 9-8-8 in Virginia, but continued work remains. The two call centers are maintaining an in-state answer rate currently at ranging from 84-92%. The call centers continue to increase capacity for their increasing needs, while managing a growing call base. As mobile dispatch was centralized to the call centers, a drop was experienced to which more funding was allocated.

Virginia funds over 96 Mobile Crisis Response teams across the state dispatched by the call center, and roughly 150 private providers also participate in this system. They are all dispatched by region and proximity to the individual in crisis. As part of Virginia's Governor's Right Help Right Now initiative, we have engaged in the rapid expansion of Crisis Receiving and stabilization centers across the state. This has created plans for over 106 new stabilization beds and 110 new receiving chairs currently in the works and further expansion anticipated in the following year.

3. Based on SAMHSA's National Guidelines for Behavioral Health Crisis Care, explain how the state will develop the crisis system.

Virginia is building a technological and administrative infrastructure for maintenance and management of the integrated crisis continuum. Several key technological elements, including the service provision and risk screenings by call center staff are implemented. Implementation of significant elements including dispatch of mobile providers, provision of mobile crisis service was implemented on December 15th across all providers. Care management and facility referral connections between community providers and inpatient facilities will be rolled out in the current fiscal year. Further development of a network of no-wrong door 23-hour crisis receiving centers along with the evolution of an already existing network of crisis stabilization units is required. This will be achieved through financial support from the state and federal sources, along with technical assistance and collaboration with Virginia Community Services Boards and private providers.

4. Briefly describe the proposed/planned activities utilizing the 5 percent set aside.

DBHDS currently utilizing the 5% to fund mobile crisis response providers through our community services boards.

They provide the backbone of response and ensure coverage across areas regardless of private provider innervation. We are exploring methods to streamline the dispatch process utilizing these dollars as well.

Please indicate areas of technical assistance needed related to this section.

While we have made great progress with mobile crisis response and dispatch, any support regarding efficiencies would be greatly appreciated.

### 21. State Planning/Advisory Council and Input on the Mental Health/Substance use disorder Block Grant Application- Required for MHBG

#### Narrative Question

---

Each state is required to establish and maintain a state Mental Health Planning/Advisory Council to carry out the statutory functions as described in 42 U.S. C. 300x-3 for adults with SMI and children with SED. To meet the needs of states that are integrating services supported by MHBG and SUPTRS BG, SAMHSA is recommending that states expand their Mental Health Advisory Council to include substance misuse prevention, SUD treatment, and recovery representation, referred to here as an Advisory/Planning Council (PC). SAMHSA encourages states to expand their required Council's comprehensive approach by designing and implementing regularly scheduled collaborations with an existing substance misuse prevention, SUD treatment, and recovery advisory council to ensure that the council reviews issues and services for persons with, or at risk, for substance misuse and SUDs. To assist with implementing a PC, SAMHSA has created [Best Practices for State Behavioral Health Planning Councils: The Road to Planning Council Integration](#).<sup>1</sup>

Planning Councils are required by statute to review state plans and implementation reports; and submit any recommended modifications to the state. Planning councils monitor, review, and evaluate, not less than once each year, the allocation and adequacy of mental health services within the state. They also serve as an advocate for individuals with M/SUD problems. SAMHSA requests that any recommendations for modifications to the application or comments to the implementation report that were received from the Planning Council be submitted to SAMHSA, regardless of whether the state has accepted the recommendations. The documentation, preferably a letter signed by the Chair of the Planning Council, should state that the Planning Council reviewed the application and implementation report and should be transmitted as attachments by the state.

<sup>1</sup><https://www.samhsa.gov/grants/block-grants/resources> [samhsa.gov]

---

#### Please consider the following items as a guide when preparing the description of the state's system:

1. How was the Council involved in the development and review of the state plan and report? Attach supporting documentation (e.g. meeting minutes, letters of support, etc.)

The Council is provided with drafts of the application and reporting and holds a meeting on August 21 2024 to discuss both a provide needs/concerns and recommendations for the block grants and state behavioral health plan and initiatives. Those are then included in a letter to the DBHDS Commissioner and is attached to this application. The Commissioner will then draft a response to provide input on the feedback provided by the Council.

This process will most likely change over the course of next year as BHAC continues strategic implementation of revised bylaws and policies and procedures to allow for more time and specific consideration in regards to the applications and reports.

2. What mechanism does the state use to plan and implement community mental health treatment, substance misuse prevention, SUD treatment, and recovery support services?

DBHDS in addition to the State Block Grant Planner has provided individuals from the Office of Community Behavioral Health Services, Office of Child and Family Services, Office of Recovery Services, to staff the Council. Individuals with lived experience in a variety of backgrounds participate in the Council as members many also represent organizations that do community work in mental health, substance misuse, and recovery. This provides multi-faceted perspectives on key issues across behavioral health.

Currently, the Council is undergoing strategic planning development and has also contracted with the Center for Human Potential for SAMHSA technical assistance. The technical assistance will be focused on best practices, what other states are doing effectively, onboarding, and improving structure and roles of the Council's membership.

In response to SAMHSA's expectations that states integrate their Mental Health Planning Councils to include substance abuse and addiction recovery perspectives, DBHDS began discussing the integration of Virginia's Mental Health Planning Council in the summer of 2011. The Council embraced the idea, and December 2011, voted to change its name from the Virginia Mental Health Planning Council to the Virginia Behavioral Health Advisory Council (BHAC). The Council subsequently voted to modify its bylaws to add seats specifically for individuals who have lived experience with substance use disorders or with co-occurring mental health and substance use disorders, their family members, substance abuse/addiction recovery advocates, and providers of substance abuse treatment services. Seats also were added for state agencies that had particular relevance for addiction services that were not represented on the Council, including the Virginia Department of Health and the Department of Criminal Justice Services.

BHAC has worked diligently following receiving federal technical assistance to rework bylaws and policies and procedures as there are still several areas where there is need for improvement. The council has identified the need to recruit new

members especially including those from diverse backgrounds and from different parts of the state. Additionally, it has identified the need for improved onboarding, training, committee and meeting structure to help narrow scope and empower the council to provide meaningful input on state behavioral health services.

3. Has the Council successfully integrated substance misuse prevention and SUD treatment and recovery or co-occurring disorder issues, concerns, and activities into its work?  Yes  No

4. Is the membership representative of the service area population (e.g. ethnic, cultural, linguistic, rural, suburban, urban, older adults, families of young children)?  Yes  No

5. Please describe the duties and responsibilities of the Council, including how it gathers meaningful input from people in recovery, families, and other important stakeholders, and how it has advocated for individuals with SMI or SED.

Vision: Effective, efficient, and accessible behavioral health services for all Virginians.

Mission: To transform Virginia's behavioral health system to reflect the highest quality of health, recovery, and wellness across the lifespan.

Per its bylaws, the Council serves as an advisory and information-sharing body which meets six times each year. In that role, the Council is responsible for reviewing and providing input to Virginia's annual behavioral health plan. As the combined Single State Agency and State Mental Health Authority, DBHDS retains responsibility for planning, allocating and managing the Mental Health and Substance Abuse Prevention and Treatment block grants. As an advisory and information-sharing body, the Council's role currently is to provide input on those components from a peer-led and multidisciplinary perspective as well as to advocate regarding behavioral health issues across the Commonwealth.

The council has done extensive work in the last year and half especially in order to revamp its structure to ensure the implementation of its federal mandate which is to provide meaningful input on the block grants application and reports as well as the state behavioral health plan. Currently, the council drafts a letter to the DBHDS commissioner which is attached to this application once completed. Additionally, the council drafts a letter to relevant legislative committees at the end of the year advocating for issues that the council has identified as critical to effective behavioral health services.

Even after strategic planning and implementation, there is significant work that needs to be done for the council to have a more robust diverse membership, provide consistent meaningful feedback that has an impact on the decisions of DBHDS, and advocate for services for those in need in Virginia. There are still needs for members from rural settings, members of the African American and Hispanic communities, members who have disabilities, etc. Additionally, there is the need for better bylaws and policies and procedures to formalize processes and allow for more consistent output from the council.

*Please indicate areas of technical assistance needed related to this section.*

The council has discussed the possibility of applying for TA based on another need in order to receive more consulting that reviews the progress that the council has made. This could assist the council in taking the next steps once bylaws and policies and procedures have been revamped to become more active and consistent in its governance, monitoring and evaluation, and advocacy regarding the block grants and state behavioral health plan.

## 22. Public Comment on the State Plan - Required

Narrative Question

[Title XIX, Subpart III, section 1941 of the PHS Act \(42 U.S.C. § 300x-51\)](#) requires, as a condition of the funding agreement for the grant, states will provide an opportunity for the public to comment on the state block grant plan. ### 23. Syringe Services Program (SSP) - Required if planning for approved use of SUBG Funding for SSP in FY 25

Planning Period Start Date: 7/1/2024 Planning Period End Date: 6/30/2025

Narrative Question:

The Substance Use Prevention, Treatment, and Recovery Services Block Grant (SUPTRS BG) restriction<sup>1,2</sup> on the use of federal funds for programs distributing sterile needles or syringes (referred to as syringe services programs (SSP)) was modified by the [Consolidated Appropriations Act, 2018](#) (P.L. 115-141) signed by President Trump on March 23, 2018<sup>3</sup>.

Section 520. *Notwithstanding any other provisions of this Act, no funds appropriated in this Act shall be used to purchase sterile needles or syringes for the hypodermic injection of any illegal drug: Provided, that such limitation does not apply to the use of funds for elements of a program other than making such purchases if the relevant State or local health department, in consultation with the Centers for Disease Control and Prevention, determines that the State or local jurisdiction, as applicable, is experiencing, or is at risk for, a significant increase in hepatitis infections or an HIV outbreak due to injection drug use, and such program is operating in accordance with State and local law.*

A state experiencing, or at risk for, a significant increase in hepatitis infections or an HIV outbreak due to injection drug use, (as determined by CDC), may propose to use SUPTRS BG to fund elements of an SSP other than to purchase sterile needles or syringes. States interested in directing SUPTRS BG funds to SSPs must provide the information requested below and receive approval from the State Project Officer. Please note that the term used in the SUPTRS BG statute and regulation, *intravenous drug user* (IVDU) is being replaced for the purposes of this discussion by the term now used by the federal government, *persons who inject drugs* (PWID).

States may consider making SUPTRS BG funds available to either one or more entities to establish elements of a SSP or to establish a relationship with an existing SSP. States should keep in mind the related PWID SUPTRS BG authorizing legislation and implementing regulation requirements when developing its Plan, specifically, requirements to provide outreach to PWID, SUD treatment and recovery services for PWID, and to routinely collaborate with other healthcare providers, which may include HIV/STD clinics, public health providers, emergency departments, and mental health centers<sup>4</sup>. SAMHSA funds cannot be supplanted, in other words, used to fund an existing SSP so that state or other non-federal funds can then be used for another program.

In the first half of calendar year 2016, the federal government released three guidance documents regarding SSPs<sup>5</sup>: These documents can be found on the Hiv.gov website: <https://www.hiv.gov/federal-response/policies-issues/syringe-services-programs>

1. [Department of Health and Human Services Implementation Guidance to Support Certain Components of Syringe Services Programs, 2016](#) from The US Department of Health and Human Services, Office of HIV/AIDS and Infectious Disease Policy <https://www.samhsa.gov/sites/default/files/grants/ssp-guidance-for-hiv-grants.pdf>,
2. Please refer to the guidance documents above and follow the steps below when requesting to direct FY 2021 funds to SSPs.

- **Step 1** - Request a Determination of Need from the CDC
- **Step 2** - Include request in the FFY 2021 Mini-Application to expend FFY 2020 - 2021 funds and support an existing SSP or establish a new SSP
  - Include proposed protocols, timeline for implementation, and overall budget
  - Submit planned expenditures and agency information on Table A listed below
- **Step 3** - Obtain State Project Officer Approval

Future years are subject to authorizing language in appropriations bills.

## End Notes

<sup>1</sup> Section 1923 (b) of Title XIX, Part B, Subpart II of the PHS Act (42 U.S.C. § 300x-23(b)) and 45 CFR § 96.126(e) requires entities that receive SUPTRS BG funds to provide substance use disorder (SUD) treatment services to PWID to also conduct outreach activities to encourage such persons to undergo SUD treatment. Any state or jurisdiction that plans to re-obligate FY 2020-2021 SUPTRS BG funds previously made available such entities for the purposes of providing substance use disorder treatment services to PWID and outreach to such persons may submit a request via its plan to SAMHSA for the purpose of incorporating elements of a SSP in one or more such entities insofar as the plan request is applicable to the FY 2020-2021 SUPTRS BG funds **only** and is consistent with guidance issued by SAMHSA.

<sup>2</sup> Section 1931(a)(1)(F) of Title XIX, Part B, Subpart II of the Public Health Service (PHS) Act (42 U.S.C. § 300x-31(a)(1)(F)) and 45 CFR § 96.135(a) (6) explicitly prohibits the use of SUPTRS BG funds to provide PWID with hypodermic needles or syringes so that such persons may inject illegal drugs unless the Surgeon General of the United States determines that a demonstration needle exchange program would be effective in reducing injection drug use and the risk of HIV transmission to others. On February 23, 2011, the Secretary of the U.S. Department of Health and Human Services published a notice in the [Federal Register](#) (76 FR 10038) indicating that the Surgeon General of the United States had made a determination that syringe services programs, when part of a comprehensive HIV prevention strategy, play a critical role in preventing HIV among PWID, facilitate entry into SUD treatment and primary care, and do not increase the illicit use of drugs.

<sup>3</sup> Division H Departments of Labor, Health and Human Services and Education and Related Agencies, Title V General Provisions, Section 520 of the Consolidated Appropriations Act, 2018 (P.L. 115-141)

<sup>4</sup> Section 1924(a) of Title XIX, Part B, Subpart II of the PHS Act (42 U.S.C. § 300x-24(a)) and 45 CFR § 96.127 requires entities that receives SUPTRS BG funds to routinely make available, directly or through other public or nonprofit private entities, tuberculosis services as described in section 1924(b)(2) of the PHS Act to each person receiving SUD treatment and recovery services.

Section 1924(b) of Title XIX, Part B, Subpart II of the PHS Act (42 U.S.C. § 300x-24(b)) and 45 CFR 96.128 requires "designated states" as defined in Section 1924(b)(2) of the PHS Act to set- aside SUPTRS BG funds to carry out 1 or more projects to make available early intervention services for HIV as defined in section 1924(b)(7)(B) at the sites at which persons are receiving SUD treatment and recovery services.

Section 1928(a) of Title XXI, Part B, Subpart II of the PHS Act (42 U.S.C. 300x-28(c)) and 45 CFR 96.132(c) requires states to ensure that substance abuse prevention and SUD treatment and recovery services providers coordinate such services with the provision of other services including, but not limited to, health services.

<sup>5</sup> ***Department of Health and Human Services Implementation Guidance to Support Certain Components of Syringe Services Programs, 2016*** describes an SSP as a comprehensive prevention program for PWID that includes the provision of sterile needles, syringes and other drug preparation equipment and disposal services, and some or all the following services:

- Comprehensive HIV risk reduction counseling related to sexual and injection and/or prescription drug misuse;
- HIV, viral hepatitis, sexually transmitted diseases (STD), and tuberculosis (TB) screening;
- Provision of naloxone (Narcan?) to reverse opiate overdoses;
- Referral and linkage to HIV, viral hepatitis, STD, and TB prevention care and treatment services;
- Referral and linkage to hepatitis A virus and hepatitis B virus vaccinations; and
- Referral to SUD treatment and recovery services, primary medical care and mental health services.

Centers for Disease Control and Prevention (CDC) Program Guidance for Implementing Certain Components of Syringe Services Programs, 2016 includes a [description of the elements of an SSP](#) that can be supported with federal funds.
